DETAILED ACTION

Claim Interpretation

1. It is noted that in amended claim 8, applicant has amended the claim to read "no more than 10% by weight" of the branching agent. As set forth by applicant on page 6 of the response, this limitation has been interpreted to require the presence of a branching agent.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-5, 8-11, and 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For claims 8 and 13, applicant sets forth that the branching agent has X groups equal to OH, NH₂, COOH, or CONH. Applicant then claims that the branching agent is tetraacetate ethylene. It appears that acetate groups do not fall within the definitions of X that are set forth in the claims. Therefore, the claims are indefinite.

Response to Arguments

4. Applicant's arguments with respect to the prior art references are persuasive in light of the amendments to the claims. However, in reviewing the claims, the examiner has presented the above issue. The examiner regrets any inconvenience to applicant, and apologizes for not raising this issue earlier. As a result, this rejection is non final.

Allowable Subject Matter

5. Claims 2-5, 8-11, and 13-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
